

# Secure Body & Arm Straps

The Secure Body & Arm Straps consists of a length of double sided soft touch fabric sandwiching a foam material.

At one end there is a double sided hook and loop fastener, which can be adjusted, in order to secure the patient prior to placing on an operating table or arm board.

## Secure Body & Arm Strap Features:

- Ideal for securing patients when on operating tables
- Strong in securing, without any damage to the skin and tissue of the patients
- Flexible - can be used on both sides
- Sizes of Body and Arm Straps are sufficient for securing most patients
